

## INTERNATIONAL TALENTS BOOSTING GROWTH

Are you recruiting people from abroad? Are you wondering about the practical issues in Finland? Support is now available for helping employees to get settled once they arrive in Finland. We offer SMEs the opportunity to receive immigration services for one or two people and their families for an easier settling.

### Help for different needs – what is included in our services?

#### Service package 1: First stage of immigration

We help your new employee to register with the authorities and take care of the essential matters, such as to get a tax card, an internet and phone subscription, and open a bank account.

#### Service package 2: Finding a home

We present at least three alternative homes for your new employee and their family, either online or by visiting the properties in person. We help to arrange a rental home including contracts and insurance.

#### Service package 3: Career guidance for a partner or spouse

We arrange career guidance for your new employee's partner or a spouse and offer them general information about study and work opportunities. We help them to update their CV and offer at least six hours of individual mentoring in total.

Southwest Finland ELY centre/Course towards Finland project (ESR) compensates 80% of the selected services, up to maximum of €5,000 + VAT. The service provider is Finland Relocation Services Oy.
